- Description: Our app is developed for direct marketing channel that provides customer more relevant information about product and offer on it and allows marketers to reach a specific target audience by creating campaigns. Our app provides new form of advertising that integrates mobile advertising with location based services to provide location specific advertisements on consumer devices. With the help of our app it is possible to target population at the right place and right time by taking advantage of a consumer's real world position. Our application helps the registered shop owners to introduce the offers to consumer who is in close proximity and provides map support to reach that shop. Another feature is that "Friend finder" used take help from friend which is present in contact list and if anyone from contact list comes in particular range then user get notification. So also get help from him.
