- Attended workshop on ASP.NET & SQL SERVER held by Matoshree Computer.
- Participated in Skill Enhancement in Server Side Scripting using PHP and MYSQL.

B.E. Final Year Project:

Title: Android Application for Bus Route Tracking

Duration : 4 Months

Project Description:

This android application is cost effective and it is beneficial to students who follow a specific travelling route a daily basis. The Bus Route Tracking System track the Current location of buses and display schedule. Also if any emergency occur then driver can send emergency message. We can extend this app as:

1. Number of seats available on the bus.
2. Students can send alert message if he/she needs help.
3. This app will help to save the fuel by combining the bus if it is made compulsory that

Each student start the app when inside bus. **Role and Responsibilities:**

- Understanding the requirement specification for the product.
- Creating UI and perform coding for specific UI.
- Deploying the Project in real life and testing it.

Activities and Interests

- Coding and always find different way.
- Learning new technology through video lectures.
- Documentary making, internet surfing and listening to music.
