- Ability to learn new technologies and tools.
- Good oral and written communication skills, embraces teamwork and collaboration.

---

## EDUCATION:

Schooling / Degree	Board / University	Year of passing	Percentage%
B.E.(Computer Engineering)	Pune University	2016	68
H.S.C.	Maharashtra State Board	2012	74.67
S.S.C.	Maharashtra State Board	2010	89.64

## TECHNICAL KNOWLEDGE:

---

- **Programming languages:** Core java, Advance Java, Spring,Hibernate,Sql.
- **Software Application** : Net beans 8.2, Eclipse, Turbo c++.
- **Web Technology** : HTML, CSS, Javascript.
- **Operating System** : Windows 7/8
- **Database** : Oracle,Sql server2012,Mysql.

## PROJECT SUMMARY

---

### Blood Bank Management System (Training Project)

- Description: The main aim of developing this system is to provide blood to the people who are in need of blood. The numbers of persons who are in need of blood are increasing in large number day by day. This blood bank management system is an online website so it is easily available to everyone. When a person wants to donate blood he have to register to the system. Donor registration is very easy, to get register to the system he have to fill up registration form. After submitting the registration form he can create username and password. The proposed Blood Bank management system helps the people who are in need of a blood by giving them all details of blood group availability or regarding the donors with the same blood group.
- Environment: JSP, Servlet, MySQL
- Team Size: 3
- Role: Developer.

#### Features:

- Register Details of users i.e. Donor and Recipient.
- Maintain blood bank with details.
- Provide clinically effective blood components.
- Blood requisition and issuance of blood.

### Health Prediction Management System(Academic Project)

- Description: Is a project which is developed to provide an easy and simple way to both users and doctors communicate with each other directly. In this application, users can search the symptoms of the diseases to the doctor from anywhere and at any time.

The user can also ask queries about their problems online directly with the doctor. Doctors can see all the details of the users and give the answers to their queries anytime. It provides an easy and simple way to users and doctors to communicate with each other. The project also saves lot of time and effort to both users and doctors.

- Environment: JSP, Servlet, MySQL, HTML,CSS,Javascript
- Team Size: 3
- Role: Developer.

#### **Features:**

- Admin main page displaying modules like view users and view doctors. View all details of users in user details page.
- First time login User need to registering and user can get login by entering unique username and password. User search result page.
- Displaying modules like search and doctor feedback .User view doctor information page and view doctors feedback page.
- Doctor need to register and login by entering username and password.
- The doctor can view the details of users query in view feedback page and sends a reply to the user.

#### **COURSE UNDERTAKEN:**

---

- 1.Completed certified C,C++,Core java, Advance Java, SQL, SoftSkill course from QuickYes InfoTech Pvt. Ltd. Pune.
- 2.Git certification course done with Udemy.

#### **EXTRACURRICULAR ACTIVITIES:**

---

- Got a Merit in scholarship exam in 4<sup>th</sup> standard.
- Got 1<sup>st</sup> Rank at Sub-district level in Painting exam.

#### **STRENGTH**

---

- Confident and Focused.
- Ability to cope up with different situations.
- Responsive.
- Self-Disciplined.

### PERSONAL INFORMATION:

---

DOB	: 03 April 1994
