➤ Project experience

1. Project Title	SHOWBUZZ
Team size	12
Role	Software Developer
Environment	Spring , Hibernate
Database	MySQL 5.0

IDE	Eclipse Luna
Server	Apache Tomcat 7.0
Description	The project “ Showbuzz ” is aimed at developing an Online Ticket reservation system for Movies, events and plays. It is a web-based application that can be accessed throughout the net. This system is basically provides the customer complete information of the movie and events, according to which the customer can book the tickets. The refund facility provides more flexibility to the system, which makes this application unique from other applications. Security is the main Criteria for the proposed system which makes this system unique. Showbuzz also provides a feature that enables an M-ticket option through which the user will receive a link along with the confirmation SMS.
