Work Experience

- **Project 1:**
  Project Name: Postemic
  Environment: Android App
  Tech. Used: Google Map/API's, JSON Parsing, Rest API, Facebook Integration
  IDE Used: Eclipse & Xcode
  Server Side Lang.: PHP
  Database used: My Sql
  URL: https://play.google.com/store/apps/details?id=com.pericent.postemic
  Description: Postemic is a social app. It is a clone of Instagram where user can share photos, videos & text. They can like & dislike the post. Post spreads depend on how many people like the post. User can share own post through Face book, Twitter, Instagram & by E-Mail.

- **Project 2:**
  Project Name: Taco nation
  Environment: iOS App
  Tech. Used: JSON Parsing, Rest API, Face book/Gmail Integration
  IDE Used: Eclipse & Xcode
  Server Side Lang.: PHP
  Database used: My Sql
  URL: https://itunes.apple.com/gb/app/taco-nation/id927266666?mt=8
  Description: Recipes for the People is the latest cooking instructional written by James Beard nominated author Melissa Guerra. Written as an app consisting of 101 recipes, Taco Nation provides recipes in both English and Spanish. Each recipe provides a grocery list, nutritional information, photos and cooking instructions. Users can switch from English with standard U.S. measurements, or Spanish, which features identical recipes with metric measurements.

- **Project 3:**
  Project Name: Bernard Health Web Services, LLC
  Tech. Used: Drupal & PHP
  Database used: My Sql
  URL: https://bernieportal.com/
  Description: With the Bernie Portal, employers are now able to move all of their benefits administration Online. Besides saving time for the office manager or HR personnel, employers save the time of all employees who used to have to deal with filling out stacks of benefits paperwork and enrollment forms each year and for changes during the year. Spouses are now happy because they know they're getting all of the information, and they have access to it in a year-round, private-labeled benefits portal.
