Academic Project

Project Title: Tours and Travels Management System
Duration: 1 Months
Description: Tours and Travels Management System is a system that gives you facility of booking any type of Tours and Travels. This system is made so that Customer will not have to Come to us to Book his\her Tours.In the present era where time proves to be the most important asset for an individual by replacing the current register system to fully computerize. This project is useful for the manager of the company as it helps them to search the data faster than existing system, to get customer record easily, **Spring** and **Hibernate Framework** integration used in our Project. **MySQL** is used to interact with the database and **HTML5, Javascript, CSS** etc. are used as a frontend technologies.

Project Title: Data Transmission Using Light Fidelity   **Duration**: 6 Months
Description: Light Fidelity(Li-Fi) refers to Visible Light Communication systems using light-emitting diodes as a medium to high-speed communication in a similar manner as Wi-Fi. In the days where internet has become a major demand, people are in a search for Wi-Fi hotspots. Li-Fi or New Life of data communication is a better alternative to Wi-Fi in wireless communication. In this project we are going to achieve high data transmission rate.
